Revision 00
Last revision date 17.10.2017

The environmental impact of the Company's operations shall be reduced to a minimum, and shall not be in violation of any international or local rules and regulations. Oil spills and discharges of other substances dangerous to the environment shall be avoided. If discharges do occur the vessel shall have adequate plans and resource in order to reduce consequences to a minimum.

Boa vessels operate in accordance with a vessel specific Garbage Management Plan in accordance with Appendix VI of the MARPOL Convention. A plan for improving energy efficiency has been developed.

Environmental impacts shall be part of the general hazard identification and risk assessment for an operation. Personnel shall be adequately trained and equipped to reduce environmental impacts.

Vessels above 400 GRT, shall have on board an approved SOPEP or SMPEP.
